BRING TO THE TABLE  
THE *al dente* PERFECTION  
OF ITALIAN TRADITIONS

FULL LINE BROCHURE

# COOKING METHOD

## DOUBLE COOKING

1

ADD SALT to boiling water.

7g salt : 1L water  
1 tsp salt : 4 cups water

2

ADD PASTA, stirring occasionally.

3

COOK THE PASTA in boiling water following the recommended pre-cooking time.

4

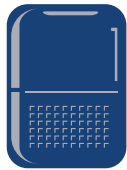

DRAIN THE PASTA.

5

PLACE THE DRAINED PASTA on a sheet tray and drizzle with a little bit of olive oil.

6

COOL THE PASTA down using a blast chiller or walk in cooler.

7

STORE IT (0-3°C or 32-37°F) on a sheet tray and cover it.

8

ALTERNATELY, cool to room temperature or chill the pasta by shocking it in a bath of ice water to stop the cooking.

9

AFTER THE PASTA IS CHILLED, store it in a plastic container with a lid or sealed plastic bag for a maximum of 48 hours.

10

BEFORE SERVICE, boil the pasta a second time for 40-60 seconds, drain the pasta and serve with your favourite sauce.

## À LA MINUTE

1

ADD SALT to boiling water.

2

ADD PASTA, stirring occasionally.

3

To achieve the best results, DRAIN THE PASTA a minute earlier than the recommended cooking time and finish the cooking process by tossing the pasta and sauce in a sauté pan.

4

BUON APPETITO!

## SUSTAINABLE *supply chain from* FIELD to FORK

Food sourced from responsible supply chains means seeking the **best ingredients** in the world to **guarantee excellent quality**, in a way that is **sustainable** and **respectful of people, animals** and the **environment**. In order to guarantee the consistency of **quality durum wheat**, we launched the **Barilla Sustainability Farming Project**, which promotes **more efficient** and **sustainable agricultural and farming practices**.

Pasta sold in Canada includes high quality durum wheat grown in the southern prairies of Alberta, Saskatchewan and Manitoba.

Since 2010, we have **REDUCED** our **CO2 EMISSIONS** by 30%

Since 2010, we have **REDUCED** our **WATER CONSUMPTION** by 21%

Our **PACKAGING** is **99.4% RECYCLABLE**

**GOOD for YOU**  
**GOOD for the PLANET\***

# THE ABCs OF PASTA QUALITY

**A** **APPEARANCE**  
Golden, amber colour vs. whitish, reddish or grayish hues. Few spots (black marks) or impurities.

**B** **BITE**  
The authentic Italian way of enjoying pasta is "*al dente*" = pasta should be firm "to the tooth" and resist to the bite.

**C** **CLARITY**  
The cooking water should be **clear**, not cloudy. Cloudy water means that excess starch is released which results in sticky, clumpy pasta.

**D** **DOESN'T BREAK DOESN'T STICK**  
Pasta should not break, or stick when cooking. Serve immediately to ensure the best meal experience.

## WHAT TO LOOK FOR IN QUALITY PASTA

Barilla

Low Quality Pasta

Barilla

Low Quality Pasta

Cloudy water caused by free starch

## PASTA = PROFIT GENERATOR

The #1 concern for Canadian foodservice operators is rising food costs.\*  
Pasta equates to **pennies** per serving.

PASTA IS 90% OF THE PLATE

BUT ONLY 10% OF TOTAL FOOD COST

Quality ingredients will guarantee a better finish dish and help improve guest satisfaction.
